

Syllabus for SMGT 332 Economics of Environmental Sustainability

Course Description

Prerequisite: SMGT 235 Economics in Society and Sustainability

The course provides an examination of the interaction between market activity and the environment as well as the use of economic decision making to manage the environment. The course applies economic analysis to the efficient and sustainable management of environmental goods and resources, and examines how economic institutions and policies can be changed to bring the environmental impacts of economic decision-making more into balance with human desires and the needs of the ecosystem.

Course Learning Outcomes

Upon successful completion of this course, students will be able to apply tools of economic analysis to understand, analyze, and solve environmental problems and environmental policy issues in terms of economic efficiency and cost effectiveness and in the context of environmental sustainability.

Course Materials

Information on course materials can be found in the [textbook section](#) of the SMGT website.

Course Requirements

Exams

The midterm will cover Modules 1-4, which include Chapters 1-10. The final exam will cover Modules 4-7, which include Chapters 11-21.

Discussions

There will be 8 discussions in the course that you will need to participate in. Discussion board participation needs to include 1 substantial post, which answers the discussion board question in 4-5 sentences, and 1 response to a fellow classmate's post in 3-4 sentences. Both types of posts need to draw on the readings, make interpretations on data when relevant, and generate questions that may have various answers depending on the context and point of view. A response to a classmate simply stating "I agree with what you said" will not be considered adequate.

Problem Sets

Each chapter/set of readings will be followed by problem sets that help you understand the material and prepare for exams. All questions must be answered fully and correctly for full credit.

Grading Policy

Midterm	50 points
Final	60 points
8 Discussions	80 points
Module 1 Problem Set	10 points
Module 2 Problem Set	10 points
Module 3 Problem Set	10 points
Module 4 Problem Set	10 points
Module 5 Problem Set	10 points
Module 6 & 7 Problem Set	10 points
Total	250 points

A	230 and higher
A-	225-229.9
B+	215-224.9
B	205-214.9
B-	200-204.9
C+	185-199.9
C	180-184.9
C-	175-179.9
D+	168-174.9
D	160-167.9
D-	150-159.9
F	149.9 and lower
